Thank you for joining our system!

=====
```

2. Login

You need to fill the information correctly in each requirement

- You have to enter username that you have registered and your password correctly. (becareful with attempt, you would be banned temporary if you enter too many wrong information).

Example: You enter too many wrong password!!

```
=====
|           Welcome To LOGIN SYSTEM           |
=====
Welcome to the Login System!
Enter username: APN
Enter Password:
!!! Wrong password !!!
!!! Please try again !!!
Remaining attempts: 2
Enter Password:
!!! Wrong password !!!
!!! Please try again !!!
Remaining attempts: 1
Enter Password:
!!! Wrong password !!!
!!! Please try again !!!
Remaining attempts: 0
Please wait before trying again.
Cooldown time remaining: 5 seconds
```

- For the verify code, you can input with both lowercase and uppercase. (With no space).
- In the retype and resend code, you will have 3 attempt for both method. But after 3 attempt of retype, you can reset attempt by using a brand new code in resend method or you can leave if you want.

3. Password Recovery

You need to fill the information correctly in each requirment

- If you lost your password, you can simply change the password by using username that you have registered before in Password Recovery .
- If you enter wrong username, the system will ask you to register, retype or leave the page. but if you enter wrong username 3 times, you will be kicked out from recovery page to main page.

Example

```
=====
|  Welcome To PASSWORD RECOVERY SYSTEM  |
=====
